

Welcome to Moss Vale Community Garden

The Southern Highlands Moss Vale Community Garden grows a broad variety of edible plants. Locals from around the area come together to create and sustain the community garden. We also celebrate the days gardening activities with morning tea and light lunch. The community garden is an educational resource for anybody interested in growing food organically, and living in a more sustainable way. Come along to one of our gardening bees on Wednesdays from 9.30am and Fridays from 10.30am to join in the fun and meet new friends
